Profile

I'm a hands-on thinker who loves exploring how things work and how they could work better.

"I believe good design starts with empathy and ends with impact. My design process blends curiosity, critical thinking, and hands on making from research and ideation to prototyping and refinement. I enjoy exploring how design can solve everyday problems, and improve the way people interact with the world around them."

Education

Master of Design, School of Planning and Architecture, Bhopal

08/2024 – Present

Bachelor of Architecture, Faculty Of Architecture & Planning, Lucknow

08/2019 – 06/2024

Professional Experience

Smartivity, Product Design Intern ✉

06/2025 – 08/2025

Project 01

Mini Multiplication Machine Design

- Designed an interactive machine to simplify multiplication learning for children (1-12).
- Applied play-based learning principles for better engagement and retention.
- Ideation, Prototyping, User Testing, Finalising Design for Mass production

Delhi

Project 02

Fraction Game

- Developed a game to make learning fractions intuitive and fun.
- Integrated visual and hands-on interaction to strengthen mathematical concepts.
- Simplified rules and components for easy usability.
- Research, Ideation, User Testing, Prototyping.

Project 03

Fraction Game

- Created a hybrid game by combining Triggler, Square-and-Dots, and Geoboard mechanics.
- Encouraged creative problem-solving and spatial reasoning in players.
- Used MDF and readily available components for a cost-effective prototype.
- Research, Ideation, User Testing, Prototyping.

Enarch Consultants PVT. LTD, Intern Architect

09/2022 – 01/2023

- Riverfront Development, Prayagraj – Concept Development
- IISER, Pune – Façade Design of Administrative Block
- APMSIDC Medical College, Andhra Pradesh – Working Drawings
- Indoor Stadium, Prayagraj – Concept Design
- RLDA Project, Visakhapatnam – Working Drawings
